

MODULAR - Self stacking, modular feature made from polished concrete, comprised of tub, tray and box elements. It can be configured to produce a variety of different forms.

TUB - **\$120** inc GST
140mm x 140mm x 140mm - 5 kg

1 TUB, 1 TRAY, 2 BOXES - **\$810** inc GST
640mm x 430mm x 965mm - 111 kg

TRAY - **\$190** inc GST
540mm x 430mm x 87mm - 22kg

1 TUB, 1 TRAY, 1 BOX - **\$560** inc GST
640mm x 430mm x 581mm - 74 kg

BOX - **\$250** inc GST
300mm x 300mm x 384mm - 37 kg

1 TUB, 1 TRAY, 1 SQUARE TRAY - **\$420** inc GST
640mm x 430mm x 337mm - 51 kg

Modular

STACK - Stack water feature comprising of the 'base' and 'top'. The tower is a self-contained feature, with water flowing over the sides. It can be configured to produce a variety of different forms.

TOP - **\$125** inc GST
300mm x 300mm x 140mm - 14kg
(inc holes and rubber gasket)

BASE - **\$265** inc GST
300mm x 300mm x 384mm - 37 kg
(inc holes and rubber gasket)

Stack

BIG STACK - A versatile water feature comprising of 'top' and as many 'frames' as desired. Ideal for areas with limited space, the big stack is a self contained water feature, with water flowing over the sides.

TOP - **\$230** inc GST
500mm x 500mm x 140mm - 38 kg
(inc holes and rubber gasket)

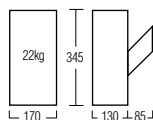

FRAME - **\$175** inc GST
500mm x 500mm x 140mm - 25 kg
(inc holes and rubber gasket)

Big Stack

CHUTE - Chute is a modular, wall mounted water feature made from concrete and stainless steel. It produces a lively and vibrant effect allowing the water to drop to the surface of the pond.

CHUTE - **\$210** inc GST

Chute

SCALE AND WET RIPPLE TILES - Tileable wall-mounted water features made from high quality concrete. The gentle flow of water produces a soothing play of light and sound.

WET RIPPLE TOP - **\$250** inc GST
245mm x 505mm x 70mm - 12 kg

SCALE TOP - **\$250** inc GST
300mm x 415mm x 80mm - 14kg

WET RIPPLE - **\$215** inc GST
245mm x 248mm x 70mm - 12kg

SCALE - **\$215** inc GST
300mm x 375mm x 80mm - 12 kg

Scale

RECOMMENDATIONS FOR STACK AND BIG STACK FEATURES:

- Maximum stack height is 1400mm (Big Stack) and 910mm (Stack).
- Each stack should be no less than 400mm from the edge of the pond to keep splashout to a minimum.
- River pebbles can be used as a diffuser to reduce splashing and noise.

RECOMMENDATIONS FOR CHUTE, SCALE AND WET RIPPLE TILE FEATURES:

- Minimum depth to allow for a submersible pump is usually 220mm.
- Feature is designed to splash and produce noise so requires a large pond.
- The mounting wall must be waterproof and able to support the weight of the piece.
