

WHY UNIVERSAL ROCKS?

SO REAL They look just like authentic, heavy bush rock, are durable and will age as nature intended. However, they will not corrode as porous cement or bush rock would, resulting in leakage. **SO LIGHT** With this lightweight technology, they're easily transported, placed and moved into position. Access is also not an issue as they can be carried through a house or even over a fence. **SO EASY** Transform your garden into a stunning watergarden in a weekend.

Universal Rocks have an extensive range of waterfalls, cascades, creeks, ponds and feature rocks. They have all been designed to be mixed and matched into what ever your imagination desires. Here are some suggested combinations to assist you with your own unique creations.
